

NA Text Extraction

The Product Asset Management (PAM) team can provide extraction and conversion services of layout files into a Word format. There are two versions available:

- Classic Text Extract
- Enhanced Text Extract

These are only available as whole chapters; however, the whole book is preferred. The process will take 2 – 3 weeks depending on complexity.

Classic Text Extract	Enhanced Text Extract
	
<ul style="list-style-type: none"> • Key styling is preserved (bold, italic, underline) • All loose text elements appear at the end of the extract (image captions, footnotes, caption, feature boxes, glossary terms) • \$0.60 per page 	<ul style="list-style-type: none"> • Actual FPO images are inserted • Loose elements will appear close to their original position • Footnotes are placed in Word footnote engine • \$0.80 per page
<p style="text-align: center;">Math equations cost for both extraction styles: \$0.45 per display equation \$0.20 per inline equation</p>	

These requests should be submitted to the PAM team via Asset Management Data Hub (AMDH) information on how to submit requests can be found [here](#). Please ensure you state the style and specific chapters/complete book in the Additional Request Requirements field within AMDH.

For information, or queries, please contact Bill Walsh at William.Walsh@pearson.com.
